HinterWelt News

Signed with EnWorld Store

We have signed up with the EnWorld online store. We are hoping that this will allow us to reach more people in a wider audience while at the same time offering our customers more choices when purchasing our e-products.

Under Attack

Hackers have been busy at work attempting to subvert our mail server. So far we have been able to fend them off and are currently in contact with Interpol to help track them down.

Changed Fulfillment Companies

We changed from Impressions Marketing and Advertising to Key 20 Direct. For most of our customers it will mean no change but for those who buy their books for game stores, it will mean using K2D instead of the IMP prefix. We needed to do this move in order to help us expand. Without going into boring detail, Impressions cost too much for the projects we have in mind. Key 20 Direct gives us the same access to distribution as Impressions at considerably less expense.

Attending Gen Con

We will be attending Gen Con this year with Mike Crow and Rafael Valez helping out. We will have our own booth and be running demos in the booth as well as several events. If you have the time, stop by our forums and tell us what you would like to see at our booth, in our demos, in our events or anything else you can think of. If you plan on going to the show, make sure you stop by the booth. Our events list is available here:
