Target Market: Women, Girlfriends of Gamers, Novice gamers (some knowledge required), Experienced gamers looking for lighthearted game.

Synopsis

Squirrel Attack is a humorous game that has players running squirrels from the Other World where Mother Nature rules and fairies live.

It is:

- A complete game
- A complete adventure

Goal oriented play (Allowing for a winner but rewarding role-playing of character aspects)

- Uses the Iridium Lite system

It is not:

- D20
- Just an adventure
- Limited to humor

The Iridium Lite system uses d20s to resolve skills based on Skill Rank + Statistic + Aptitude. Aptitudes are set during character development and never change. There are 11 statistics from Strength to Luck. Success with a skill or spell is determined by rolling a d20. If it is under the numbers added together then success.

Combat is determined on a Defense rating (STR+AGL) and the attacker must roll over that (i.e. defeat the opponents skill) on a d20. Ten areas of the body may be targeted by rolling under the attacker's weapon skill on a d20.

Magic is based on Skill Rank + Statistic + Spell Rank rendering a similar 3 to 20 range. To activate the spell, the player simply rolls a d20 and rolls under the Skill Rank + Statistic + Spell rank number.

Dice needed for Squirrel Attack are primarily a d20 but also the full range of polyhedrals for damage dice.

What's Inside

Squirrel Attack is the first of our Complete Game Series. This is a small format, complete core rules for easy travel.

- Complete Iridium Lite System
- Six pre-generated characters
- Color maps
